## Executive Summary

The purpose of the Utah Department of Health and Human Services Office of Vital Records and Statistics is to accurately, timely, and securely record the vital events for Utah residents. Utah began to compile data on legally performed abortions in 1974 to comply with Utah State law (§76-7-305.7) that requires a report on abortions performed in Utah to be presented to the Utah State Legislature. The abortion report makes commonly used vital records statistics available to lawmakers, health programs, health care providers, businesses, researchers, educational institutions, and members of the public.

Data are presented at the state level as well as the local health district. The reports do not contain abortion data at the national level. National data is published by the U.S. Centers for Disease Control and Prevention (CDC) and can be found in the Morbidity and Mortality Weekly Report, "Abortion Surveillance – United States". The most recent national report is for 2019 and can be found at

<https://www.cdc.gov/mmwr/volumes/70/ss/ss7009a1.htm>.

Included in this report:

- The number of reported abortions is on a downward trend in Utah even though Utah's population continues to grow. In 1990, the number of abortions performed in Utah was 4,796. In 2020, the number was 2,362. Abortions for residents of Utah went from 4,159 in 1990 to 2,244 in 2020.
- The highest ratio of abortions per 1,000 births in 2020 was in Summit health district with a ratio of 100.8 abortions per 1,000 births. The lowest reported was in the Southwest health district with a ratio of 8.1 per 1,000 births.
- In 2020, the ratio of abortions per 1,000 births for unmarried women was 184.7, which is substantially higher than the 16.3 for married women. This is a decrease in the ratio for unmarried women from 216.3 in 2019 to 184.7 in 2020. The ratio of abortions for married women also decreased from 21.7 in 2019 to 16.3 in 2020.

The report contains summary data tables and detailed reference tables for the 2020 calendar year. To protect individual privacy, Utah Department of Health and Human Services data suppression rules have been applied to the data in this report.

## Definitions

Abortion or Induced Termination of Pregnancy (ITOP) is defined in Utah State law in §76-7a-101 Definitions.

(1)(a) "Abortion" means:

- (i) the intentional termination or attempted termination of human pregnancy after implantation of a fertilized ovum through a medical procedure carried out by a physician or through a substance used under the direction of a physician;
- (ii) the intentional killing or attempted killing of a live unborn child through a medical procedure carried out by a physician or through a substance used under the direction of a physician; or
- (iii) the intentional causing or attempted causing of a miscarriage through a medical procedure carried out by a physician or through a substance used under the direction of a physician.

(b) "Abortion" does not include:

- (i) removal of a dead unborn child;
- (ii) removal of an ectopic pregnancy; or
- (iii) the killing or attempted killing of an unborn child without the consent of the pregnant woman, unless:
  - (A) the killing or attempted killing is done through a medical procedure carried out by a physician or through a substance used under the direction of a physician; and
  - (B) the physician is unable to obtain the consent due to a medical emergency.

2019	712,029	46,832	2,776	3.9	59.3	2,922
2020	724,782	45,724	2,244	3.1	49.1	2,362

<sup>1</sup>The female population estimates, for years prior to 1999, were provided by Utah Population Estimates Committee (UPEC) and the Governor's Office of Planning and Budget (GOPB). For years 2000 and after, population estimates were produced by the Population Estimates Program of the U.S. Census Bureau in collaboration with the National Center for Health Statistics (NCHS). All population estimates apply to July 1 of the selected year. They are updated on IBIS regularly. For more information go to <http://ibis.health.utah.gov/query/PopEst.html>.

<sup>2</sup>Rates are per 1,000 females 15 to 44 years of age.

<sup>3</sup>Ratios are per 1,000 live births.

<sup>4</sup>Utah occurrence includes nonresidents with abortions occurring in Utah.

Table 2. Abortions by state of residence: Utah occurrences, 2020

State of residence	Frequency	Percent
Total	2,362	100.0
Idaho	44	1.9
Nevada	16	0.7
Texas	5	0.2

2020	724,782	128,889	120,845	120,102	125,195	119,456	110,295

The female population estimates, for years prior to 1999, were provided by Utah Population Estimates Committee (UPEC) and the Governor's Office of Planning and Budget (GOPB). For years 2000 and after, population estimates were produced by the Population Estimates Program of the U.S. Census Bureau in collaboration with the National Center for Health Statistics (NCHS). All population estimates apply to July 1 of the selected year. They are updated on IBIS regularly. For more information go to <http://ibis.health.utah.gov/query/PopEst.html>.

Table 6. Abortion, age-specific rates, five-year age groupings for 15-44 years of age: Utah residents, 1990 and 2000-2020

Year	Total	Five-year age groupings					
	15-44	15-19	20-24	25-29	30-34	35-39	40-44
1990	10.5	12.7	19.8	13.2	7.8	4.1	1.5
2000	6.2	5.3	10.3	8.4	6.0	3.4	1.1
2001	6.3	5.1	9.8	8.4	6.5	3.9	1.2
2002	6.1	4.8	9.5	8.6	5.9	3.9	1.2
2003	6.1	5.1	9.3	8.2	6.2	4.1	1.2
2004	6.2	4.9	10.0	7.8	6.0	4.0	1.3
2005	5.9	4.9	8.8	7.9	5.4	4.3	1.2
2006	6.1	5.3	9.7	8.0	5.5	3.8	1.2
2007	6.1	5.4	9.9	7.6	5.4	3.8	1.5
2008	6.0	5.2	9.1	7.9	5.2	3.9	1.7
2009	5.5	4.2	8.9	6.9	5.1	3.9	1.4
2010	5.7	3.7	8.5	6.9	4.7	3.1	1.5
2011	5.0	3.6	8.5	6.9	4.7	3.0	1.5
2012	4.8	3.2	8.3	6.1	4.7	3.6	1.5
2013	4.6	3.0	8.1	5.9	4.8	2.9	1.2
2014	4.3	2.8	7.6	5.6	4.2	3.3	1.1
2015	4.5	2.9	8.2	6.5	4.3	3.0	1.3
2016	4.2	2.3	7.5	6.1	3.9	3.0	1.1
2017	4.0	2.7	7.4	5.9	3.8	2.6	1.0
2018	4.1	3.1	7.5	6.1	4.0	2.7	0.9
2019	3.9	2.8	7.2	6.1	3.6	2.5	0.8
2020	3.1	2.0	6.0	4.6	3.1	1.8	0.8

Rates are per 1,000 females 15-33 years of age. The abortion component of the rate for total all ages includes women less than 15 years of age, 45 years and older, and age unknown.

Numbers may not add to total due to missing data.

Table R3. Abortions by age and marital status of woman: Utah residents, 2020

Age	Marital status of woman						Total
	Never	Married	Widowed	Divorced	Separated	Not stated	
Total	1,425	479	6	204	113	17	2,244
Under 15	5	0	0	0	0	0	5
Total 15 to 19	256	**	0	**	**	**	262
15 to 17	51	0	0	0	0	0	51
18 to 19	205	**	0	**	**	**	211
20 to 24	610	78	0	16	19	**	727
25 to 29	344	118	**	54	30	5	552
30 to 34	138	148	0	58	36	**	383
35 to 39	55	85	**	53	22	**	220
40 to 44	15	45	**	20	**	**	86
45 and over	**	**	0	**	**	0	**

\*\*All non-zero counts fewer than five are suppressed.  
Numbers may not add to total due to missing data.

Table R4. Abortions by weeks of gestation and marital status of woman: Utah residents, 2020

Weeks of gestation	Marital status of woman						Total
	Never married	Married	Widowed	Divorced	Separated	Not Stated	
Total	1,425	479	6	204	113	17	2,244
Under 5	**	**	0	**	0	0	6
5-6	495	192	**	81	46	8	825
7-8	419	121	**	57	33	**	636
9-10	226	55	**	23	12	**	319
11-12	137	33	0	18	14	**	203
13-14	69	25	0	14	5	**	114
15-20	65	37	0	8	**	**	114
21 and over	11	15	0	**	0	0	27

The first day of last menstrual period is used to calculate gestation when the physician's clinical estimate is not available.

\*\*All non-zero counts which are fewer than five are suppressed.

Numbers may not add to total due to missing data.

Table R5. Abortions by age and education of woman: Utah residents, 2020

Age	Education of woman				Total
	Did Not Graduate High School	High School Graduate	Beyond High School	Not Stated	
Total	202	905	911	226	2,244
Under 15	5	0	0	0	5
Total 15 to 19	71	127	37	27	262
15 to 17	48	**	0	**	51
18 to 19	23	125	37	26	211
20 to 24	46	352	253	76	727

40 to 44	86	55	0	0	31	0
45 and over	**	**	0	0	**	0

<sup>1</sup>Surgical Curettage, including D&C/D&E: Dilation and Curettage (D&C) procedures may also be called aspiration curettage, suction curettage, manual vacuum aspiration, menstrual extraction/regulation or sharp curettage. Dilation and Evacuation procedures (D&E) may also be called Intact Dilation and Evacuation (F&X), or partial-birth abortions. If one of these procedures is listed, the abortion is categorized as a surgical procedure, even if medications are listed, as medications may be used as part of the surgical procedure to facilitate its completion.

<sup>2</sup>Intrauterine Instillation: Intra-amniotic injection, typically with saline, prostaglandin or urea.

<sup>3</sup>Nedical Non-Surgical: Includes early medical terminations and medical induction of labor.

\*\*All non-zero counts fewer than five are suppressed.

Numbers may not add to total due to missing data.

Table R15. Abortions by weeks of gestation and method of termination: Utah residents, 2020

Weeks of gestation	Total	Method of termination				
		Surgical curettage, including D&C/D&E <sup>1</sup>	Surgical hysterectomy or hysterotomy	Intrauterine instillation <sup>2</sup>	Medical non- surgical <sup>3</sup>	Not stated
Total	2,244	1,359	0	0	885	0
Under 5	6	0	0	0	6	0
5-6	825	328	0	0	497	0
7-8	636	333	0	0	303	0
9-10	319	248	0	0	71	0
11-12	203	203	0	0	0	0
13-14	114	114	0	0	0	0
15-20	114	111	0	0	**	0
21 and over	27	22	0	0	5	0

The first day of last menstrual period is used to calculate gestation when the physician's clinical estimate is not available.

<sup>1</sup>Surgical Curettage, including D&C/D&E: Dilation and Curettage (D&C) procedures may also be called aspiration curettage, suction curettage, manual vacuum aspiration, menstrual extraction/regulation or sharp curettage. Dilation and Evacuation procedures (D&E) may also be called Intact Dilation and Evacuation (F&X), or partial-birth abortions. If one of these procedures is listed, the abortion is categorized as a surgical procedure, even if medications are listed, as medications may be used as part of the surgical procedure to facilitate its completion.

<sup>2</sup>Intrauterine Instillation: Intra-amniotic injection, typically with saline, prostaglandin or urea.

<sup>3</sup>Nedical Non-Surgical: Includes early medical terminations and medical induction of labor.

\*\*All non-zero counts fewer than five are suppressed.

Numbers may not add to total due to missing data.

Table R16. Abortions by age of woman and mention of any complications: Utah residents, 2020

Age of woman	Total	Mention of any complications	
		Yes	No
Total	2,244	**	2,240
Under 15	5	0	5
Total 15 to 19	262	0	262

25 to 29	552	17	67	190	278
30 to 34	383	20	57	130	176
35 to 39	220	6	27	89	98
40 to 44	86	**	10	35	37
45 and over	**	0	**	**	**
Not stated	5	0	**	**	**

Tables R18—R21: Not stated includes those who indicated they did not use any sort of contraception.

\*\*All non-zero counts fewer than five are suppressed.

Numbers may not add to total due to missing data.

Table R19. Abortions by marital status of woman and method of contraception:  
Utah residents, 2020

Marital status of woman	Total	Method of contraception			
		Highly effective: Implant, IUD	Moderately effective: shot, pill, patch, ring, diaphragm	Least effective: condom, withdrawal, sponge, spermicide, natural family planning	Not stated
Total	2,244	73	322	756	1,093
Never Married	1,425	36	218	461	710
Married	479	18	54	173	234
Widowed	6	0	**	**	**
Divorced	204	13	36	69	86
Separated	113	5	12	47	49
Not stated	17	**	**	**	11

\*\*All non-zero counts fewer than five are suppressed.

Numbers may not add to total due to missing data.

Table R20. Abortions by prior abortions and method of contraception: Utah residents, 2020

Prior abortions	Total	Method of contraception			
		Highly effective: Implant, IUD	Moderately effective: shot, pill, patch, ring, diaphragm	Least effective: condom, withdrawal, sponge, spermicide, natural family planning	Not stated
Total	2,244	73	322	756	1,093
No prior abortions	1,651	51	232	534	834
One prior abortion	455	22	65	172	196
Two prior abortions	98	0	19	42	37
Three prior abortions	14	0	**	**	9
Four prior abortions	**	0	**	**	**
More than five prior abortions	5	0	**	**	**
Not stated	17	0	**	**	12

\*\*All non-zero counts fewer than five are suppressed.  
Numbers may not add to total due to missing data.

Table R21. Abortions by education of woman and method of contraception: Utah residents, 2020

Education of woman	Total	Method of contraception			
		Highly effective: Implant, IUD	Moderately effective: shot, pill, patch, ring, diaphragm	Least effective: condom, withdrawal, sponge, spermicide, natural family planning	Not stated
Total	2,244	73	322	756	1,093
Under 12 years	202	**	22	80	97
High school graduate or GED	905	24	129	321	431
Over 12 years	911	40	153	337	381
Not stated	226	6	18	18	184

\*\*All non-zero counts fewer than five are suppressed.  
Numbers may not add to total due to missing data.

*2020 Appendix:*

Abortions

## Technical Appendix

The Utah Vital Records and Statistics Abortion Report was first published in 1977 and reported on the combined years of 1974 and 1975. In 1980, a second report was published that included 1974 through 1977 data (duplicating the years reported in the first report and adding years 1976 and 1977). The years 1978-1980 were reported in the statistical report published in 1982. Reports of the years from 1981 through 2017 were published annually from one to two years following the close of the data year. The time between the end of the data year and the publication of the report is used to gather and compile the data, which is done by hand from paper forms. Of some interest are the years 1983 and 1984. These two reports are marked in the Utah Digital Library as “unpublished” but a full report is available. Data for 1992, 1993, and 1994 were published in separate reports all published in 1996 and it appears data for 2002 was published separately in 2003 and then included with 2003 data and published in 2004. The last report was published in 2021 and reported 2019 data making this report of the 2020 data the 41st report.

Section 76-7-313, Utah Code Annotated 1953 as amended requires that the report of induced termination of pregnancy (Form 1) be filed with the State of Utah’s Department of Health within ten days of the abortion.

The reported number of abortions to Utah residents performed out of state is small and suggests an undercount. This small number of reported abortions that occur in other states are not shown by local health district in this report.

For both the summary and reference table in this report, data may be tabulated by local health district to meet the needs of local health departments.

Formulas used to compute rates and ratios used in this report are defined as follows:

$$\text{Abortion Rate} = \frac{\text{Total Number of Induced Abortions to Resident Females (1,000)}}{\text{Total Number of Resident Females 15-44 Years of Age}}$$

$$\text{Abortion Ratio} = \frac{\text{Total Number of Induced Abortions to Resident Females (1,000)}}{\text{Total Number of Live Births to Resident Females}}$$

To protect individual privacy, Utah Department of Health and Human Services data suppression rules have been applied to the data in this report. All non-zero counts fewer than five are suppressed.

Tables from prior reports display data for counties within local health districts. The suppression rules used in this report make county data less informative so the decision was made to remove county data. There are 29 counties within the 13 local health districts. The local health districts and respective counties are Bear River (Box Elder, Cache, Rich), Central Utah (Juab, Millard, Piute, Sanpete, Sevier, Wayne), Davis, Salt Lake, San Juan, Southeastern (Carbon, Emery, Grand), Southwest (Beaver, Garfield, Iron, Kane, Washington), Summit, Tooele, TriCounty (Daggett, Duchesne, Uintah), Utah County, Wasatch, and Weber-Morgan (Morgan, Weber).

The form that follows was used in 2020 prior to the merge of the Department of Health into the Department of Health and Human Services.

The categorization of contraception methods is from the [CDC Reproductive Health](#).
